SUMMARY:

Full-stack software developer with hands-on experience in both front-end and back-end development. Skilled in designing and implementing web and mobile applications, focusing on seamless user experiences and robust backend systems.

TECHNICAL SKILLS:

Frontend – HTML, CSS, JavaScript, React JS

Backend – C#, ASP.NET Core (MVC / Web API), ASP.NET MVC, REST APIs, ASP.NET Identity

Database – MS SQL Server, Firebase, SQLite, Entity Framework Core, EF Migrations

Languages – JavaScript, C/C++, C#, Python

Frameworks – ASP.NET Core (MVC), Xamarin.Forms, .NET MAUI

Tools/ Version Control – Git, GitHub, IIS, Visual Studio

EXPERIENCE:

Senior Technical Associate (Programmer)

Forest Survey of India, Dehradun | Feb 2026 – Present

- Maintained and enhanced a forest fire monitoring system built on .NET 8, ensuring reliability and performance.
- Designed and implemented new features and enhancements to improve system functionality.
- Identified, analysed, and resolved bugs and performance issues, optimizing application efficiency.
- Managed **database operations**, including data integrity, optimization, and efficient data handling.

Technical Associate (Programmer)

Forest Survey of India, Dehradun | Feb 2024 – Jan 2026

- Developed and maintained dynamic websites using JavaScript, C#, ASP.NET MVC, and MS SQL Server.
- Built mobile and web applications for data collection and management, integrating features like OTP-based verification and authentication.
- Troubleshoot and resolved application issues to improve system stability and performance.
- Designed front-end interfaces using HTML, CSS, and JavaScript to improve user experience.
- Worked with Xamarin.Forms and .NET MAUI to build mobile applications for field data collection.
- Designed, managed, and normalized database schemas to improve data integrity, consistency, and performance.

Assistant Programmer

Forest Survey of India, Dehradun | July 2023 - Jan 2024

- Designed front-end interfaces using HTML, CSS, and JavaScript to improve user experience.
- Developed and maintained dynamic websites using JavaScript, C#, ASP.NET MVC, and MS SQL Server.

EDUCATION:

Bachelor's Degree in Computer Science (B.Tech – CSE).

Graphic Era University, Dehradun | July 2019 – June 2023

PROJECTS:

Forest Fire Monitoring Portal

TechStack: HTML, CSS, JavaScript, ASP .NET Core (MVC), C#, MS SQL Server

- Maintaining a real-time forest fire monitoring portal, implementing new features, fixing bugs, and optimizing performance for reliable alert delivery across India. Managed database operations, ensuring data integrity, efficient handling, and overall system stability.
- Improved dashboard loading time by over 99% through implementation of SQL Server Agent jobs and database-level caching.

National Working Plan Code, NWPC-23 - Android Application

TechStack: XAML, Xamarin.Forms, .NET MAUI, C#, SQLite,

- Worked on an offline-capable Android application built using Xamarin.Forms for efficient field data collection.
- Enabled offline data entry functionality to allow users to capture field data without internet connectivity, improving data collection speed compared to manual forms.
- Worked on REST APIs to synchronize locally stored data with the central server when internet connectivity becomes available.
- Migrated and upgraded the legacy Xamarin.Forms application to .NET MAUI to improve performance, maintainability, and cross-platform compatibility.

User Management Portal

TechStack: HTML, CSS, JavaScript, ASP .NET Core (MVC), C#, MS SQL Server

- Created a dynamic web platform for user management, reducing login creation workload by 90%.
- Integrated authentication, authorization and OTP-based email verification features.
- Added functionalities for password reset and change, as well as a dashboard for analytics.

Recruitment Portal

TechStack: HTML, CSS, JavaScript, ASP .NET Core (MVC), C#, MS SQL Server

- Built and deployed an ASP.NET-based Recruitment Portal with SQL Server, featuring secure authentication, OTP verification, application management, and IIS hosting for the Forest Survey of India.

Single Sign on (SSO) Implementation using Cookie authentication

TechStack: HTML, CSS, JavaScript, ASP .NET Core (MVC), C#, MS SQL Server

- Developed and implemented a Single Sign-On (SSO) solution using shared authentication cookies across multiple ASP.NET applications, enabling secure and seamless cross-application access with a single login.
